Author Management

IDE- Eclipse
Build- Maven
Framework- Spring MVC & Spring ORM
Database- PostgreSQL
Database Name-AUTHOR

The application has been developed using annotations in Spring MVC with Hibernate. Home.jsp is the Landing page which has following two buttons.
Admin – Click on the button to create/ update/ delete Author
Login Author – Click on the button to login as Author using author id and email id. For simplicity no validation has been applied yet on the login button.

Url-http://localhost:8080/Author/

By clicking on the Admin button, Author List will get displayed. Following 4 operations can been performed at this page.

Add Author – This will open the new page to enter author details and submit into the database.
Delete – It will delete the author from the database and update the same page with the result.
Home- It will land into the home page.

Authors List

First Name	Last Name	Email	Operations
Author	One	one@gmail.com	delete update
Author	Two	two@gmail.com	delete update

[Add Author] [Home]

Update Author- It will open the new page with selected author details and allow admin to modify the details.

Id   17
First Name [Author]
Last Name   [One]
Email   [one@gmail.com]
[Submit]

Login Author – This will land into the login page of the author. ID can be found in the Author Update Page as shown above.

Login Author

ID :   [Enter Id]
Email : [Enter Email Id]
[Login] [Home]

After Login, author will land into the author account page. Author can view their details and click on the following buttons.

ManageText- Click on the this button to land into new page to Manage the texts.
Signout- It will land into homepage.
